## Professional Summary

Full-stack developer with expertise in creating elegant, performant web applications that solve real-world problems. Specializing in bridging design and development with modern technologies, I deliver solutions that are both beautiful and functional. My approach combines technical excellence with user-centric design, ensuring every project meets both business objectives and user expectations.

I leverage AI as a problem-solving partner, not a replacement for human creativity. This approach accelerates development while maintaining innovative, original solutions.
